1**Introduction****My Story**

I was a very shy person due to which I was not able to communicate with new people, in order to improve this I started reading body language books, changed my body language yet it didn't helped much due to which I again got frustrated, felt sad for myself. As this was happening during my college days I was writing lot of stuff, assignment, journals so one day I just got curious as why I write like this? Why my friend is having different handwriting & I have different one? Is there any reason behind it just like body language? So I just googled "why we have different handwriting" & after reading various blogs I got a blog on Graphology.

Curiosity got me & I kept reading one blog to another to learn more and more about Graphology. I read a blog on "how to find extrovert from handwriting, sign" it was about large

size handwriting, sign. I thought what if I change my handwriting, sign size?

With practice I started writing with large size & I don't remember exactly yet after a month or two I was just able to talk with strangers which before was not easy.

Next up was confidence so I read another blog which was about letter t, adding high t bar helped me in increasing my confidence & my self-image after that I added many more changes & my life started improving.

Now since I wanted to learn more yet there was no educational page on Graphology on insta I decided to start one, also I wanted to give back this knowledge which helped me improve. At the start I just posted pictures about Graphology and then it went to videos, blogs, courses & now book.

So Graphology helped me in becoming a public speaker from a shy person. It can help you as well. We have often told to change our thoughts to change personality and it's not that easy yet there is one way to improve your personality and change your thoughts, that way is Graphology

Handwriting analysis and signature analysis are the 2 units of Graphology and here we are going to study about signature analysis.

If you are getting started in Graphology then signature analysis is the key as you will learn complete signature analysis more faster as core concepts here are less. After signature analysis you can move to handwriting

After reading this book I believe the way you used look at signature will significantly change.

You will be able to shock, impress anyone by finding their personality with just signature. "I am impressed", "You are a magician", "How can you get to know so much about me?", "Whatever you said is so trueeee!", I get feedbacks like this whenever I do the analysis and now you will get same after you do analysis. The book has been written in a such a way that you can start doing analysis from first page. Just look at sample and then find the trait related to that sample. For eg- If you observe first name in sample then find first name trait in the book

LOOK AND ANALYZE

GRAPHOLOGY

How Does It Work?

YOU

We Daily think lot of thoughts, feel lot of emotions. Now we cannot share every feeling, emotions with others

YOUR
BRAIN

And if not shared such feelings can lead to depression, overthinking. So a outlet is needed to remove those emotions

YOUR
HANDWRITING,
SIGN

Our Brain Finds that outlet through our handwriting and signature. Every feeling, emotions is then transported from brain to your handwriting, signature

1] Graphology

- **In Simple Words, Graphology is a science of finding someone's whole personality with handwriting, sign.**
- **Some Practical Examples Which Proves Graphology Works:**
- **At the start of exam your mind is clear henceforth handwriting is clear whereas during last 10 minutes your mind is running faster henceforth handwriting is dirty or messy!**
- **We have always being told to do journaling or write our emotions down. And whenever we write down our emotions we automatically feel calm. You know why? Because your brain transfers all those emotions into handwriting, signature**
- **Observe yourself whenever you feel happy you look up while being sad you look down. Same concept is here**
- **Most poet, artists handwriting, sign is always tilted in right direction. In graphology it shows creativity**
- **Most of the introverts always have small handwriting, extroverts have large size. You can check your friend's handwriting**

COMPARISON BETWEEN SIGN, HANDWRITING ANALYSIS

Handwriting Analysis

1. Handwriting is all about your private personality
2. It reveals writer's real personality
3. Writer cannot hide his/her true self here as handwriting reveals everything.
4. Handwriting analysis have more than 5000+ traits as each letter have more sub categories
5. Handwriting analysis is just a way of finding personality by just looking at handwriting elements like letters
6. It takes more time to learn Handwriting Analysis as concepts are more
7. It is hard to find someone's handwriting sample as we often sign more be it in attendance sheet, casual signs, etc.

COMPARISON BETWEEN SIGN, HANDWRITING ANALYSIS

Signature Analysis

- 1. Signature is all about your public personality**
- 2. It tells how writer want others to see him as**
- 3. Sometimes a writer show something different in front of others and in reality they are different**
- 4. Signature analysis have 100+ core concepts**
- 5. Signature analysis is the science of finding someone's personality by looking at signature elements like underlines, dots**
- 6. If you are getting started in graphology then you can first start with sign analysis as you will master it quickly as compared to handwriting**
- 7. You will often find someone's sign more**

WHY NOT PRIVATE PERSONA?

- In handwriting you write sentences, words which are about different topics yet in sign you only write names.
- Those words and sentences communicate your feelings for others directly like word "happy", "sad", "love" etc. help you know what you are really feeling yet in sign just names cannot tell what are you feeling so your real private feelings are not shown in sign.
- And your name reveals only about you!
- Another person cannot know what you feel about them or about a particular thing.
- Since signature cannot reveal true feelings directly via words it only reveals public persona

Passive Investing in index funds & ETFs is getting popular. Here what you need to know when investing in these schemes. Many factors can create a divergence between a fund & index. Execution beyond liquid frontline stocks can be erratic. Large flows also create divergences as buying & selling in bulk is difficult.

Niyati Mishra

Follow below steps to do analysis, with time & experience you will be able to create your own steps, way of analysis

Step 1: Sample

- 1. Tell writer to sign at least 3 times with blue/black pen on a blank or single line ruled paper**
- 2. If possible take handwriting sample as well**
- 3. Ask the writer what name they have written up. Eg- first name or last name or other**
- 4. Sometimes a writer may have different types of sign, ask them to give all the types and let you know which one do they use the most.**

Analysis Steps

Step 2: Scanning & Noting

- 1. Which name is written? Spacing is correct or not? (If two names are present)**
- 2. Name legible or illegible**
- 3. How many underlines? Dots?**
- 4. Check Direction & Slant**
- 5. Size too**
- 6. Is there any emotional distress or negative trait?**
- 7. Letter traits (t, y, i, other letters)**
- 8. Where is sign placed?**
- 9. Check speed if writer is signing in front of you**
- 10. Is it same as the handwriting? (Conditions)**
- 11. What can you say about writer's public personality (summary)**
- 12. Any suggestions for improvements?**

Step 3: Explanation: The PNC Method

- 1. Positive Traits**
- 2. Negative Traits**
- 3. Improvements or Changes**

ANALYSIS SHORT DEMO - ONLY 1 NAME

1]

Positive Points:

1. First name initial and full last name is present which shows writer is someone who make sacrifice for others. Hardworking person
2. Upward signature shows good optimism. Writer likes to be in front as a leader.
3. Writer is someone who have personal values and follow principles to live their life. Single underline

4. Want to be seen as a confident person who dream big. High t bar is present

- Now let's look at things which needs improvement--

1. Writer is having circle around "A" only not around last name which shows writer is trying to protect their emotions from outside influence

2. Self-blame, writer blames himself even when their mistake is not there

- Changes writer must do:

1. Remove the circle and write A clearly

- In the beginning just do the analysis and don't try to suggest more than 2 changes. After gaining 1-2 year experience you can suggest more

- Also try to be human so instead of "Private person" you can say "Writer is a private person who doesn't just open up to new people"

- Mention the trait as well. For Eg- First Name shows writer is independent. (It helps in building trust that you are saying according to trait not from your imagination)

 1. **Writer is emotional in nature so if writer is facing problem because of being emotional then it needs to be changed**
 2. **Spacing between first name and last name is more. Writer doesn't feel close with the family**
- **Changes writer must do:**
 1. **Decrease the spacing between names**
 2. **Write sign with straight slant if writer is facing issues due to being emotional**
- **Again, In the beginning just do the analysis and don't try to suggest more than 2 changes. After gaining 1-2 year experience you can suggest more (VERY IMPORTANT)**
